Your new home – all in perfect harmony

Our design philosophy at D/RES is based on the understanding that humans need a connection to nature in order to thrive.

The use of natural elements and innovative processes in our design improves well-being, comfort, and creates a wholly positive living experience.

Natural elements within our designs create a timeless beauty. Through the combination of nature and modern designs, a contemporary and unique style emerges. Materials and textures that reflect the natural environment bring comfort, warmth, and a sense of pride for the homeowner. Good design future proofs a home, provides low energy costs, minimises environmental impact and supports biodiversity for new communities to thrive.

A sustainable lifestyle

Sustainability is a key driver in every part of the design and construction of D/RES homes in Bellevue. From exceptional energy efficiency (minimum A2 BER) to the environmental impact of the materials we select, combine to deliver premium quality, future proofed homes in Bellevue. The homes in Bellevue are fossil fuel free, with top quality heat pumps and heat recovery ventilation providing optimum thermal comfort and indoor air quality.

To support homeowners who would like to maximise the sustainability potential of their new home we have developed a Positive Living offering with our energy partner Pinery.

Positive Living is a bespoke renewable energy offering which can be tailored to your individual home and energy profile. Positive Living includes solar PV panels to self-generate renewable energy, with the option of electric battery storage and smart energy management to put the power back in your hands and control how you use energy in your home. Electric vehicle charging points can also be included in the system if required. All Positive Living homes will be connected as a community microgrid, allowing neighbours to share excess energy and feed back into the national grid.

The homes in Bellevue are the sustainable homes of the future, today.
